PROFESSIONAL SUMMARY:

Software Engineer with 4+ years of professional experience and a B.S. in Computer Science (Summa Cum Laude). Specialist in modernizing legacy financial systems, currently transitioning enterprise applications from Struts2 to AngularJS. Expert in Java, TypeScript, and SQL, with a deep focus on building scalable APIs and maintaining high-security standards in the FinTech sector.

PROFESSIONAL SKILLS:

- **Languages:** Java, TypeScript, JavaScript (ES6+), Python, Ruby, PHP, SOQL
- **Front-End:** AngularJS, React (Redux), React Native, HTML5, CSS3, Bootstrap
- **Back-End & Frameworks:** Apache Maven, Struts 2, Ruby on Rails, Laravel
- **Databases:** MySQL, IBM Db2, PostgreSQL, SQL
- **Tools & DevOps:** Git (GitHub/GitLab), Linux, Jira, Salesforce Automation
- **Environments:** IntelliJ, Visual Studio, Android Studio

PROFESSIONAL EXPERIENCE:

IMS Integration | Software Developer | 01/2023 – Present | Remote, CA

- Developed and deployed an internal automation suite using Java, Python, and SOQL, streamlining workflows for the support team and saving 100+ manual hours annually.
- Managed specialized DevOps projects under the direction of the CTO, automating Jira and Salesforce integrations to eliminate operational bottlenecks and improve reporting accuracy.
- Contributed to a full-stack modernization initiative, migrating legacy Struts2 applications to AngularJS to improve performance and address long-standing client pain points.
- Engineered front-end and back-end enhancements for core applications, ensuring high feature parity during the transition and improving the overall user experience.
- Resolved complex technical issues for credit union clients by performing deep-dive debugging and investigative querying via IBM Db2 and MySQL.
- Designed membership insight workflows and custom reports, providing credit unions with critical data visibility into their application and membership pipelines.

Smarttwigs | Software Engineer (Intern) | 02/2022 – 01/2023 | Remote, CA

- Developed interactive UI components using React, React Native, and Redux, contributing to a 40% increase in page load speed and a more responsive user experience.
- Integrated Mix panel analytics and data visualization tools to improve user data accuracy and provide stakeholders with better usage insights.
- Refactored legacy code segments under senior mentorship, implementing MVC and RESTful patterns to improve maintainability and performance

EDUCATION:

B.S. in Computer Science (Summa Cum Laude) | Colorado Technical University | 2023
